

GLOW IN THE DARK MOSQUITO NET

INSTRUCTIONS

Correctly suspend your mosquito net:

1. Drill into the ceiling and secure the suspension hook over the center of the bed for the best insect protection.
 2. Thread a piece of nylon cord through the elastic loop.
 3. Attach the cord of the hook and adjust height for perfect coverage. Bottom of net should just touch the floor.
- * For hole-free installation, span a horizontal wire to which the net can be attached.

FOLDING

1. Hold the circular frame with both hands.
2. Turn one hand backwards while turning the other hand forwards.
3. The ring will want to collapse upon itself. Bring the circles together. Hold the collapsed ring firmly and wrap netting around it to hold in place.

WASHING INSTRUCTIONS

When washing the mosquito net, we recommend you use a washing bag to protect the fabric. Use a small amount of detergent and wash at a temperature lower than 40°C (104°F).

WARNING!

- Choking hazard - small parts. Not for children under 3 years or any individual who has a tendency to place inedible objects in their mouth.
- Possible entanglement and strangulation hazard.
- Keep away from fire and sharp objects.
